LONDON, E. C., ENGLAND, 58 Holborn Viaduct

THE following pages contain a few illustrations of our Interlocking Rubber Tiling, showing range of colors and its possibilities in the way of design.

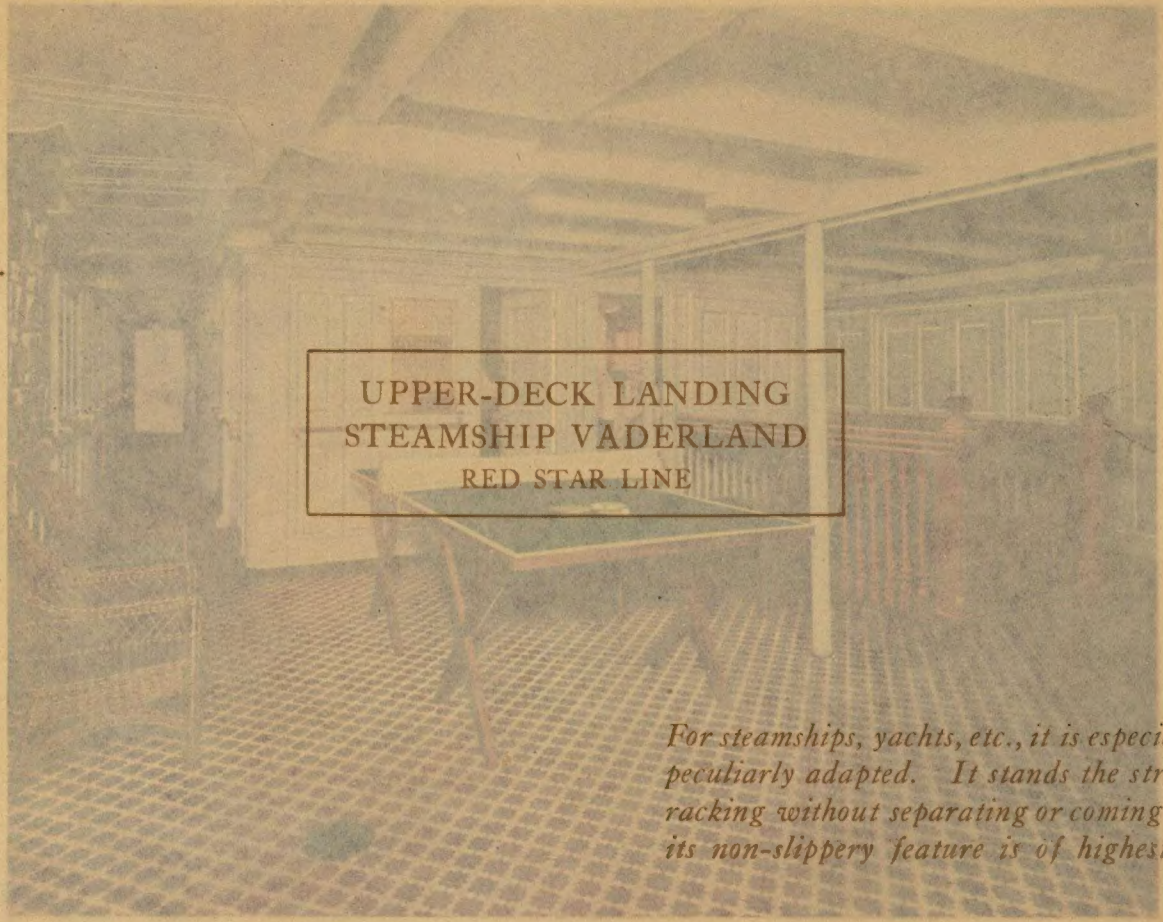
The advantages claimed for Interlocking Rubber Tiling over other forms of tiles and floor coverings are as follows:

It is noiseless, non-slippery, waterproof, thoroughly sanitary and so durable as to last practically a life time without requiring repairs. It may be laid directly upon existing floor, whether of wood, cement, stone or iron, therefore saving the expense of constructing a concrete floor which is absolutely necessary in all other kinds of tiling.

As this material generally does not require to be laid in cement, the work of laying may be accomplished during business hours without interruption.

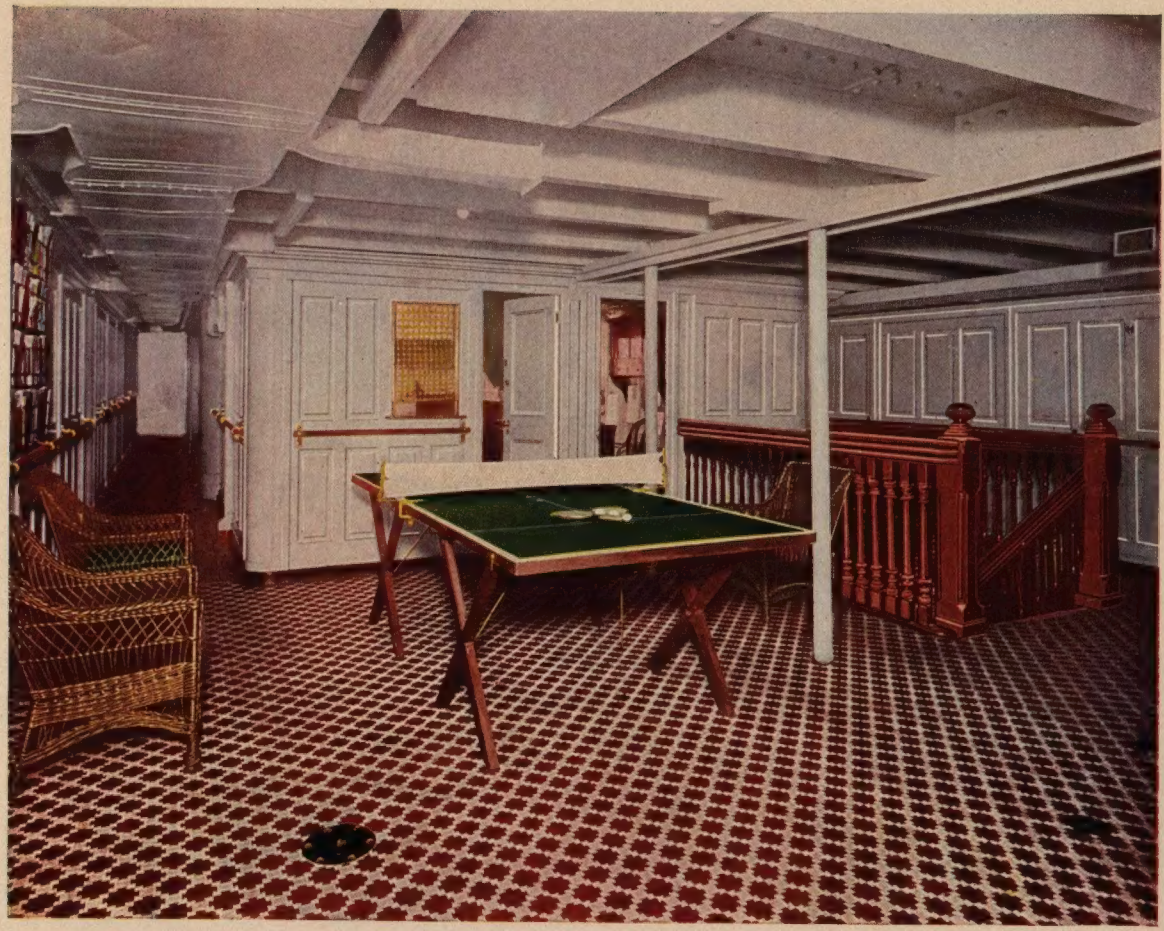
For banking-rooms, corridors of public buildings, steamships, yachts, railroad cars, hospitals, billiard-rooms, kitchens, pantries, bath-rooms, vestibules, etc., it is especially desirable.

We will gladly furnish samples and further data upon application.



UPPER-DECK LANDING
STEAMSHIP VADERLAND
RED STAR LINE

For steamships, yachts, etc., it is especially and peculiarly adapted. It stands the strain and racking without separating or coming up, and its non-slippery feature is of highest value.



QUARTER-DECK
FALL RIVER LINE
STEAMER "PRISCILLA"

It is capable of being designed into harmonious color combinations in keeping with any surroundings. Beautiful effects both in tile and carpet designs may be made.

MAIN CORRIDOR
EMPIRE BUILDING
Broadway and Rector St., N. Y. City

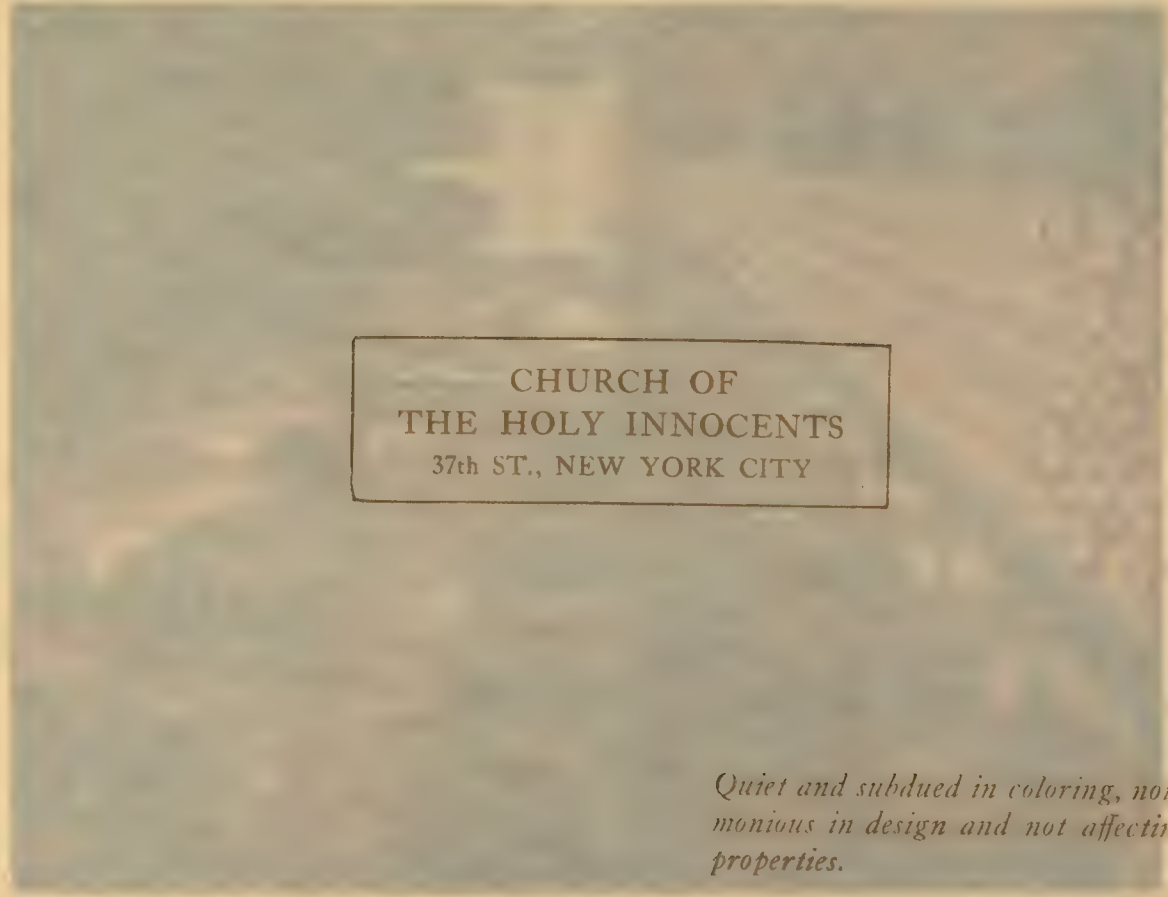
Its extraordinary durability is shown where the traffic is most severe.

LOBBY OF COUNTY
SAVINGS BANK & TRUST CO.
SCRANTON, PA.

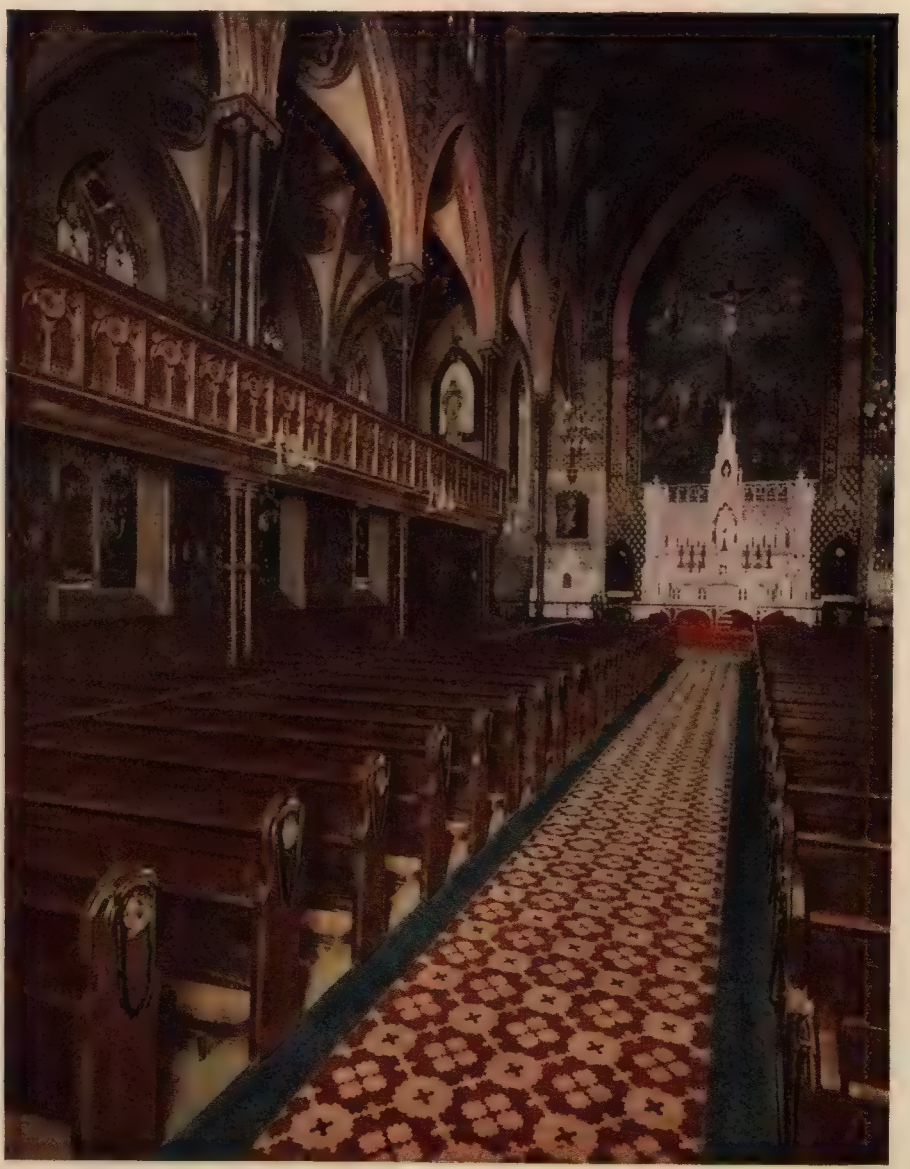
It is noiseless, sanitary, stains and impurities quickly removed, leaving it as bright as when first laid.

LIBRARY
BOYS' HIGH SCHOOL
PHILADELPHIA, PA.

It is only necessary to mention Interlocking Rubber Tiling in connection with Library floors to have one appreciate its superiority ***for this purpose.***



Quiet and subdued in coloring, noiseless, harmonious in design and not affecting acoustic properties.



Restful to the feet, waterproof and germ proof.
Dirt stains, etc., may be readily removed.

For Theatre Lobbies, Aisles, Foyers, etc., its distinctive qualities will be appreciated.
